

RANCHO BERNARDO *Endodontics*

THINGS TO KNOW BEFORE & AFTER YOUR DENTAL APPOINTMENT WHEN TAKING TRIAZOLAM

- If you were given an anti-anxiety medication to take the night before treatment, please take it as directed.
- Eat a light meal 1½ -2 hours prior to your treatment (i.e. piece of toast, half a bagel, fruit, etc.)
- You must be driven to and picked up from your appointment by a responsible companion. After you get home, someone should stay with you to observe your recovery.
- Take your regular medications as usual unless otherwise specified by your physician or dentist.
- Plan to take the day off from work on the day of your treatment.
- Please arrive 1 hour before your scheduled appointment time to take the triazolam.
- Once you arrive at the office and take the triazolam, you must not leave the office unescorted.
- Alcohol consumption is not recommended 8 hours prior to your appointment or for 12 hours after your appointment.
- Do not operate heavy machinery or drive for 12 hours after your appointment.
- We request that you drink plenty of water after your appointment to keep yourself well hydrated.
